During the eighth term of the Central Committee of the Workers' Party of Korea (2021-2025), Kim Jong Un, general secretary of the Workers' Party of Korea and president of the State Affairs of the Democratic People's Republic of Korea, was on a ceaseless journey, giving guidance for the country's economic construction and the promotion of the well-being of the people.

Having clarified his will to bring about substantial transformations and innovations to this end at the Eighth Congress of the Workers' Party of Korea, he indicated all the ways and means for their implementation.

Thanks to his painstaking efforts, a large number of projects aimed at bringing happiness to the people were launched, and a new era of comprehensive development of socialism was opened, when all realms of state building and all the regions of the country undergo transformation simultaneously.

Fresh changes took place in all sectors of the economic construction of the state and social life: Modern houses sprang up in the capital city of Pyongyang and in the rural communities; regional-industry factories, advanced hospitals, leisure complexes and tourist resorts were built in different parts of the country; all the sectors of the national economy achieved balanced development; and the agricultural productivity increased steadily.

All these creations and transformations are a brilliant fruition of the energetic guidance of the respected Comrade Kim Jong Un, who was on a ceaseless journey for the well-being of the people.
